

Asmita — UI/UX Design Plan

Version: 0.1 **Date:** 2026-05-12 **Status:** Pre-development **Derived from:** PRD v0.2 · TRD v0.1 · Implementation Plan v0.1

This document defines the complete design system, screen flows, and component inventory for Asmita's Phase 1 web application. Every design decision here was made through a deliberate conversation about the platform's audience, tone, and technical constraints. Designers and developers should treat this as the source of truth for visual and interaction decisions.

Table of Contents

1. Design Philosophy
2. Design Tokens
3. Typography
4. Spacing & Layout
5. Component Library
6. Information Architecture
7. Landing Page — Section by Section
8. Victim Flow — One Screen at a Time

10. Support Resources Page
11. Minor Pathway
12. Error & Empty States
13. Responsive Strategy
14. Accessibility
15. Copy & Tone Guidelines
16. Developer Handoff Notes

1. Design Philosophy

The Reference Point

Stripe's structural confidence + Notion's warmth and breathing room. Neither is copied directly — Asmita has a specific audience and purpose that both reference points were not designed for. What carries over: the typographic discipline, the whitespace generosity, the single-CTA-per-view principle, and the trust built through clarity rather than decoration.

The Audience Constraint

Many users arrive in distress — on a mobile phone, possibly with shaking hands, possibly being watched. Every design decision is tested against this scenario: *can someone in acute distress on a small screen complete this task without getting lost?*

This is why:

- One thing per screen in the victim flow
- No competing CTAs
- No modal dialogs that interrupt flow
- Status language is plain, never technical
- Support resources are always one tap away

What This Platform Is Not

- Not a government portal — no dense tables, no bureaucratic forms, no paragraph-heavy pages
- Not a mental health app — no pastel gradients, no "safe space" imagery, no infantilising softness
- Not a SaaS dashboard — no left nav, no notification bells, no feature menus

The Register

Design says: We are competent and trustworthy. **Copy says:** We understand this is hard.

The visual language is calm and serious. The words are direct and human. Neither tries to do the other's job.

2. Design Tokens

These are the only colours permitted on the platform. No additions without a documented reason.

Colour

```

/* Core */
--color-hero-bg:      #0D1F1E; /* Near-black, teal undertone – hero sections */
--color-accent:        #0A5E5A; /* Deep teal – buttons, active states, links */
--color-accent-hover:  #085250; /* Teal darkened 8% – button hover */
--color-accent-light:  #E6F4F3; /* 5% teal tint – card highlights, step active bg */
--color-surface:       #F8F7F5; /* Warm off-white – main page background */
--color-surface-white: #FFFFFF; /* Pure white – card backgrounds */
--color-border:        #E5E7EB; /* Neutral border – cards, inputs default */
--color-border-focus:  #0A5E5A; /* Teal – input focus ring */

/* Text */
--color-text:          #111111; /* Near-black – all body text */
--color-text-muted:    #6B7280; /* Grey – labels, captions, secondary info */
--color-text-on-dark:  #FFFFFF; /* White – text on hero-bg */
--color-text-on-dark-muted: #A1B5B4; /* Muted white – secondary on dark sections */

/* Status */
--color-status-queued: #9CA3AF; /* Grey – notice queued / awaiting review */
--color-status-sent:   #0A5E5A; /* Teal – notice sent */
--color-status-escalated: #D97706; /* Amber – escalated */
--color-status-removed: #16A34A; /* Green – content removed */
--color-status-error:  #DC2626; /* Red – errors only */

/* Never use red except for actual errors. Never use green except for confirmed removal. */

```

Border Radius

```

--radius-sm: 6px; /* Badges, small chips */
--radius-md: 8px; /* Buttons */
--radius-lg: 12px; /* Cards */
--radius-xl: 16px; /* Large containers */
--radius-full: 9999px; /* Pills / status badges */

```

Elevation

No box shadows on victim-facing pages. Cards use border only (`1px solid var(--color-border)`). This is a deliberate Notion-style choice — clean edges, no depth tricks.

The only exception: the primary CTA button on the landing page hero gets a subtle `0 4px 24px rgba(10, 94, 90, 0.3)` teal glow on hover — a single, purposeful elevation moment.

3. Typography

Typeface Stack

```
/* Latin */
font-family: 'Inter', -apple-system, BlinkMacSystemFont, 'Segoe UI', sans-serif;

/* Devanagari (Hindi) – loaded alongside Inter */
font-family: 'Noto Sans Devanagari', 'Inter', sans-serif;
```

Both loaded from self-hosted assets (not Google Fonts CDN in production — victim IP must not be shared with third parties). See TRD I18N-03.

Type Scale

Token	Size	Weight	Line Height	Use
display	48px	700	1.1	Hero heading
h1	36px	700	1.2	Page title
h2	24px	600	1.3	Section heading
h3	18px	600	1.4	Card title, step label
body-lg	18px	400	1.7	Lead paragraphs
body	16px	400	1.6	All body copy
body-sm	14px	400	1.5	Captions, secondary text
label	13px	500	1.4	Form labels, badges
micro	11px	500	1.3	Legal fine print only

Mobile: `display` scales to 36px. `h1` scales to 28px. Everything else stays the same.

4. Spacing & Layout

Spacing Scale (8-point grid)

```
--space-1: 4px
--space-2: 8px
--space-3: 12px
--space-4: 16px
--space-5: 20px
--space-6: 24px
--space-8: 32px
--space-10: 40px
--space-12: 48px
--space-16: 64px
--space-20: 80px
--space-24: 96px
```

All spacing decisions use this scale. No arbitrary pixel values.

Layout Widths

```
--width-content: 640px; /* Victim flow forms – single column, centred */
--width-text: 720px; /* Landing page text blocks */
--width-wide: 960px; /* Dashboard, landing page sections */
--width-max: 1200px; /* Absolute maximum – landing page full sections */
```

Page Structure

```
| NAVBAR (fixed, 64px height) |
| SUPPORT BAR (static, 36px, on all |
| victim-flow pages) ← always visible |
| CONTENT |
| (centred, max-width per context) |
| FOOTER |
```

5. Component Library

5.1 Navbar

Desktop:

[Asmita अस्मिता]

[HI | EN]

[Start Your Case →]

- Logo: wordmark only — "Asmita" in Inter 600, "अस्मिता" in Noto Sans Devanagari 400, slightly muted, beside it
- No navigation links in the navbar on victim-facing pages
- Language toggle: text, not a dropdown. "HI" and "EN" separated by a pipe. Active language in teal, inactive muted.
- CTA button: primary teal, 40px height, appears only on landing page. Hidden inside victim flow (no distractions).
- Background: #FFFFFF with 1px solid var(--color-border) bottom border. Not sticky on landing page. Sticky on victim flow and dashboard pages.

Mobile:

- Logo left, hamburger right — but hamburger only opens: Language toggle + CHILDLINE helpline number + link to Support page. Nothing else. Not a full menu.

5.2 Support Bar

Present on all victim-flow pages (registration through dashboard). Not on landing page.

Need help right now? CHILDLINE: 1098 | iCall: 9152987821 |

- Background: #E6F4F3 (accent-light)
- Text: body-sm, color-text-muted
- Helpline numbers: color-accent, font-weight: 600
- 36px height. Full width. Not dismissible.

5.3 Buttons

Primary Button

```
Background:    var(--color-accent)      #0A5E5A
Text:          white, Inter 500, 15px
Height:        48px desktop / 52px mobile
Padding:       0 24px
Border-radius: var(--radius-md)        8px
Hover:         var(--color-accent-hover) #085250
Focus:         2px offset ring, #0A5E5A
Disabled:      50% opacity, cursor: not-allowed
```

Secondary Button

```
Background:    transparent
Border:        1.5px solid var(--color-accent)
Text:          var(--color-accent), Inter 500, 15px
Height:        48px desktop / 52px mobile
Hover:         Background var(--color-accent-light)
```

Destructive / Warning (account deletion only)

```

Background:    transparent
Border:        1.5px solid #DC2626
Text:          #DC2626
Hover:         Background #FEF2F2

```

Rule: **one primary button per screen**. Secondary buttons are for back/cancel only. Never two primary buttons in view simultaneously.

5.4 Form Inputs

```

Label:
  font-size: 13px (--label)
  font-weight: 500
  color: var(--color-text-muted)
  margin-bottom: 6px
  display: block

Input:
  height: 52px
  border: 1.5px solid var(--color-border)    #E5E7EB
  border-radius: var(--radius-md)            8px
  padding: 0 16px
  font-size: 16px (prevents iOS zoom)
  font-family: Inter
  background: #FFFFFF
  color: var(--color-text)

  :focus
    border-color: var(--color-accent)          #0A5E5A
    outline: none
    box-shadow: 0 0 0 3px rgba(10,94,90,0.12)

  :error
    border-color: var(--color-status-error)    #DC2626

Error message (below input):
  font-size: 14px
  color: #DC2626
  margin-top: 4px
  display: flex
  align-items: center
  gap: 4px
  (small warning icon + text)

```

No red backgrounds. Error is communicated through border colour and a small inline message below the field. Nothing alarming. Nothing full-screen.

5.5 Progress Indicator (Victim Flow)

At the top of every victim-flow screen. Shows the current step and total steps.

① Register — ② Declare — ③ Submit — ④ Done
[filled] [active] [empty] [empty]

- Steps shown as numbered circles (28px diameter)
- Completed: filled teal circle, white checkmark
- Active: teal border, teal number, teal label
- Future: grey border, grey number, grey label
- Connector line: solid teal for completed segments, dashed grey for future
- Labels: `body-sm`, below each circle
- On mobile: step number only (no labels), centred row

5.6 Status Badges

Pill-shaped. Used in the case dashboard for per-URL status.

```
[• Queued]          bg: #F3F4F6 text: #6B7280
[• Notice Sent]    bg: #E6F4F3 text: #0A5E5A
[• Escalated]      bg: #FEF3C7 text: #D97706
[• Removed]        bg: #DCFCE7 text: #16A34A
[• Awaiting Review] bg: #F3F4F6 text: #6B7280
[• Legal Package Ready] bg: #FEF3C7 text: #D97706
```

Dot before label matches text colour. Border-radius: `--radius-full`. Height 24px. Padding 0 10px. Font: `label` (13px, 500).

5.7 Cards

Used in the dashboard (one card per submitted URL) and in the landing page (How It Works section).

```
Background:    #FFFFFF
Border:        1px solid var(--color-border)
Border-radius: var(--radius-lg)          12px
Padding:       20px 24px (desktop) / 16px (mobile)
No box-shadow.
```

URL Status Card (Dashboard):

```
[Platform icon 20px]  twitter.com/user/... |
Truncated URL – max 60 chars, then ellipsis |
|                                                              |
[• Notice Sent]       12 May · 10:34 IST |
|                                                              |
|                                                              | [View detail →]
```

5.8 Step Screen Container (Victim Flow)

Every victim-flow screen uses this container:

```

/ Landing page
/start Age attestation (entry to victim flow)
/start/minor Minor pathway (if under 18)
/register Email registration
/verify OTP verification
/declare Digital declaration
/verify-identity Aadhaar / DigiLocker (optional – can skip)
/submit URL submission
/submitted Confirmation screen
/case/[ref] Case dashboard (authenticated)
/case/[ref]/url/[id] URL detail + notice timeline
/resources Support resources (public, no auth required)
/about About Asmita (public)
/faq FAQ (public)
/privacy Privacy policy (public)
/legal Legal notices / DMCA info (public)

Admin (separate subdomain: admin.asmita.org):
/admin/login
/admin/queue
/admin/platforms
/admin/templates
/admin/metrics

```

All victim-flow pages (`/start` through `/submitted`) are a **linear, forward-only flow**. Back navigation returns to the previous step but never jumps. No step is reachable by direct URL without the session state that precedes it.

7. Landing Page — Section by Section

Section 1 — Navbar

```
Background: #FFFFFF, 1px border-bottom  
[Asmita अस्मिता] [HI | EN] [Start Your Case →]
```

Not sticky on the landing page (content takes precedence). Becomes sticky on scroll past the hero.

Section 2 — Hero (Dark)

```
Background: #0D1F1E (near-black, teal undertone)  
Padding: 120px 0 (desktop) / 80px 0 (mobile)  
Content: centred, max-width 720px
```

Content structure:

```
[Small label, ALL CAPS, teal, letter-spaced]  
FREE · CONFIDENTIAL · INDIA  
  
[Display heading, white, 48px]  
"You don't have to  
face this alone."  
  
[Body-lg, muted white, #A1B5B4, max-width 520px]  
"If intimate images of you have been shared without  
your consent, Asmita sends legal takedown notices  
on your behalf – grounded in Indian law."  
  
[Primary CTA button – white label, teal background]  
"Start Your Case →"  
  
[Micro text, muted white]  
"No images are ever uploaded. No lawyers needed.  
Works across Instagram, YouTube, Telegram, and more."
```

No background imagery. No gradients. No decorative elements. The words do the work.

Section 3 — What Asmita Does (White)

```
Background: #FFFFFF  
Padding: 80px 0  
Max-width: 960px, centred
```

Three cards in a row (desktop) / stacked (mobile):

Icons: line-style, 32px, teal. No filled icons. No illustrations.

Section 4 — How It Works (Warm Off-White)

Background: #F8F7F5
 Padding: 80px 0
 Max-width: 720px, centred

Numbered steps, left-aligned, vertical on all viewports:

Step numbers: 32px circle, teal border, teal number, Inter 700. Connector: dashed vertical line between circles.

Section 5 — The Law Is On Your Side (White)

Background: #FFFFFF
 Padding: 80px 0
 Max-width: 720px, centred
 Two columns: text left (60%) / trust signals right (40%)

Left column: Heading (h2): *"Platforms are legally required to respond."*

Body: Plain-language explanation of IT Rules 2021 Rule 3(2)(b). Two short paragraphs. No legal jargon.
Ends with: *"You don't need a lawyer or a court order. Asmita does this for you."*

Right column (trust signals):

Checkmarks in teal. Card border #E5E7EB. No background colour on the trust card.

Section 6 — Your Privacy (Teal-Tinted)

Heading (h2): *"We never see your content."*

Three short lines with icon:

- [Lock icon] Your images and videos are never uploaded to Asmita.
- [Link icon] We only use the URL — treated as a text string, nothing more.
- [Shield icon] Your email is encrypted. Your case is yours alone.

Section 7 — Support Is Here (White)

Heading (h2): *"You're not alone in this."*

Three NGO partner cards in a row — name, one-line description, helpline number. Minimal. Not the hero of the page.

Section 8 — Final CTA (Dark, mirrors hero)

```
Background: #0D1F1E
Padding: 96px 0
Content: centred
```

Heading (h2, white): *"Ready when you are."* Body (muted white): *"It's free. Confidential. Takes about 10 minutes."* Primary button: *"Start Your Case →"*

Section 9 — Footer

```
Background: #0D1F1E (continues from CTA section, no visual break)
Border-top: 1px solid rgba(255,255,255,0.1)
Padding: 40px 0
```

Left: Asmita wordmark (white) + one-line description. **Centre:** CHILDLINE: **1098** (prominent, white, large) — this is the only large-text element in the footer. **Right:** Links — About · FAQ · Privacy · Legal · Contact

Bottom strip: `body-sm`, muted white — *"Asmita is an independent non-profit platform. Not affiliated with any government body."*

8. Victim Flow — One Screen at a Time

Every screen follows the Step Screen Container (§5.8). Progress indicator persists at the top. Support bar persists just below the navbar.

Screen F-01 — Age Attestation

Route: `/start`

```
Step: - of 4 (no step highlighted yet - pre-flow)

Heading: "Before we begin"

Body: "This service is for adults 18 and older.
      If you are under 18, we'll direct you to
      the right support."

[ ] I am 18 or older [ ] I am under 18

[Continue →] (disabled until one option selected)
```

Selecting "I am under 18" changes the CTA to "Show me where to go →" and routes to `/start/minor`. No ambiguity. No shared flow.

Screen F-02 — Minor Pathway

Route: `/start/minor` See §11 for full minor pathway screen design.

Screen F-03 — Email Registration

Route: `/register` Step: 1 of 4

```
Step label: "Step 1 of 4"
Heading:    "Your email address"
Body:      "This is the only thing we need to start.
           We'll send you a one-time code to confirm."
```

```
[Label] Email address
[Input – type: email, placeholder: you@example.com]
```

```
[Send Code →]
```

```
Below input, very small muted text:
"We only use your email to send case updates.
It is encrypted and never shared."
```

No name, no phone, no other fields on this screen.

Screen F-04 — OTP Verification

Route: `/verify` Step: 1 of 4 (same step — sub-step of registration)

```
Heading: "Check your email"
Body:    "We sent a 6-digit code to [email].
         It expires in 10 minutes."
```

```
[Label] Enter the code
[Input – type: tel, inputmode: numeric, maxlength: 6,
       large font: 24px, letter-spacing: 8px,
       centred text]
```

```
[Verify →]
```

```
[← Change email address] [Resend code]
(plain text links, muted, below button)
```

```
Resend: disabled for 60 seconds after send.
Shows countdown: "Resend in 0:45"
```

No password. No username. OTP only.

Screen F-05 — Digital Declaration

Route: `/declare` Step: 2 of 4

This screen is intentionally unhurried. It asks for deliberate attention.

Step label: "Step 2 of 4"
 Heading: "One important confirmation"
 Body: "Please read this carefully before continuing."

Declaration	
"I confirm that I am the person depicted in this content, or an authorised representative with documented consent.	
I declare under the Information Technology Act, 2000 (Section 66) and IPC Section 191 that this submission is truthful."	
Making a false submission is a criminal offence under Indian law.	

☐ I have read and confirm the above declaration

[I Confirm and Declare →] (disabled until checkbox checked)

← Back

The declaration box: background #F8F7F5, border 1px solid #E5E7EB, padding 24px, border-radius 12px. The text inside is body size — readable, not small print.

The checkbox is large (20px × 20px). It takes a deliberate action. No pre-checking, no "by continuing you agree" patterns.

Screen F-06 — Optional Identity Verification

Route: /verify-identity Step: 2 of 4 (sub-step)

Heading: "Strengthen your notice (optional)"
 Body: "Platforms take verified notices more seriously.
 You can verify your identity using Aadhaar offline – no Aadhaar number is ever stored."

[Card: Aadhaar Offline XML]

How: Download your Aadhaar offline XML from UIDAI's website, then upload it here.

We extract: your name only. Nothing else.

[Upload Aadhaar XML →] (secondary button)

[Card: DigiLocker]

[Verify with DigiLocker →] (secondary button)

[Skip for now – continue without verification]
 (plain text link, muted, larger than usual – skipping must feel equally valid)

Skipping is not a small link at the bottom. It is a clear, accessible option. Victims in crisis should not feel pressured to gather documents.

Screen F-07 — URL Submission

Route: `/submit` Step: 3 of 4

```
Step label: "Step 3 of 4"
Heading:    "Where is the content?"
Body:       "Paste the link (URL) where you found
             the content. You can add more than one."
```

```
[Label] Web address (URL)
[Input - type: url, placeholder: https://...]
```

```
[+ Add another URL] (text link, teal, below input)
- each click adds another URL input field
- max display: 5 fields; after 5 a note says
  "You can add more URLs after submitting"
```

```
[Small info box - #E6F4F3 background]
"We never open or download content at these
links. The URL is used only to identify the
platform and send the notice."
```

```
[Submit and Send Notice →]
```

```
← Back
```

If a URL fails validation (not a valid URL format): inline error below that specific field. Other fields are unaffected.

Screen F-08 — Confirmation

Route: `/submitted` Step: 4 of 4

[Large teal checkmark icon – 48px – centred]

Heading: "Your notices are being sent."

Body: "We've started sending takedown notices for
[N] URL(s). You'll receive a confirmation
email shortly with your case number."

Your case reference number

ASMITA-202605-00042

[Copy to clipboard]

Save this. You'll need it to check your case.

[Go to My Case Dashboard →] (primary button)

What happens next:

- Notice sent to platform Grievance Officer
- If no response in 24 hours, we escalate
- You'll receive email updates at each step
- Download your full case record any time

The case reference number is displayed large (h2 weight, monospace font). Copy to clipboard is a single click. This is data the victim must save — make it impossible to miss.

9. Case Dashboard

Route: `/case/[ref]` Auth: Case ref + email OTP

Layout

NAVBAR (sticky)

SUPPORT BAR

Sidebar (desktop only, 240px)

Case ASMITA-202605-00042

- My URLs (active)
- Support Resources
- Download Case PDF
- Delete My Case

CHILDLINE: 1098

iCall: 9152987821

Main content

[Status summary strip]

3 URLs submitted · 1 removed
· 1 escalated · 1 pending

[URL card]

[URL card]

[URL card]

[+ Add another URL]

Mobile: Sidebar collapses. Support resources accessible via a fixed bottom bar showing helpline number. URL cards stack full-width.

Status Summary Strip

Background #F8F7F5. No alarming colours. Status counts use badge colours matching §5.6.

URL Status Card (expanded view on click)

Clicking "View detail →" expands an inline timeline (not a new page):

Timeline icons: ✓ teal (done), ! amber (escalated), ○ grey (pending). Plain language. IST timestamps.

Add URL (from dashboard)

Download Case PDF

Secondary button in sidebar / mobile menu. Triggers PDF generation (TRD FR-DASH-05). No new tab — file download directly.

Delete My Case

Plain text link in sidebar. Clicking shows an inline confirmation (not a modal):

Delete your case?

This removes all your data from Asmita within 30 days.
You will lose access to your case dashboard and
notice history.

This cannot be undone.

[Yes, delete my case] (destructive button – red)

[Keep my case] (secondary button)

10. Support Resources Page

Route: `/resources` Auth: None required — public

Single column, `--width-text` (720px). Light, breathing layout.

Sections:

1. **If you're in immediate danger** — CHILDLINE 1098, large, at the top
2. **Mental health support** — iCall (TISS), full details, how to reach
3. **Cyber safety support** — Cyber Peace Foundation, Red Dot Foundation
4. **Free legal aid** — District Legal Services Authority (state selector → local contact)
5. **How to file an FIR** — step-by-step, plain language, in Hindi and English
6. **How to use cybercrime.gov.in** — step-by-step alongside Asmita
7. **FAQ** — collapsible items (accordion pattern, teal chevron toggle)

No images. No stock photos. Clean, readable. Accessible without an account.

11. Minor Pathway

Route: `/start/minor` Auth: None — no session created

NAVBAR (no CTA button – not shown)
 (No support bar – replaced by CHILDLINE prominently in content)

[Teal care icon – 40px]

Heading (h1):

"You're in the right place."

Body:

"Because you are under 18, we want to make sure you get the best possible help – and that means connecting you directly to the services best equipped for your situation."

[Card – most prominent]

CHILDLINE – 1098

Free. 24 hours. Hindi and English.

[Call 1098 →] (tel: link, primary button)

[Card]

TakeItDown.org

Free global service for under-18s.

Works with platforms to remove content.

[Go to TakeItDown.org →] (external link)

[Card]

cybercrime.gov.in

How to file a complaint – step by step.

[See the steps →] (links to resources page)

[← Go back] (plain text – if they mis-selected age, let them return easily)

No Asmita case flow. No data collected. No session. No notice sent. This screen is informational only.

12. Error & Empty States

Form Validation Errors

Inline, below the specific field. Never a page-level alert for input errors.

[Input with red border]

⚠ Please enter a valid web address (e.g. <https://twitter.com/...>)

Network / Server Error

Shown as a calm inline notice at the top of the current screen — not a full-page error:

```
Something went wrong on our end. Your progress
has been saved. Please try again.
[Try again →]
```

Background `#FEF3C7` (amber tint). No red. No alarm.

404 Page

```
Heading: "This page doesn't exist."
Body:    "If you're looking for your case, log in
          with your case reference number."
[Go to case login →] (primary)
[Go to homepage →]  (secondary)
```

No custom illustration. No humorous copy. Clean, direct.

Empty Dashboard (no URLs submitted yet)

```
[Simple empty state illustration – abstract, teal, 80px]
"No URLs submitted yet."
"Return here any time to check the status of
your notices once you've submitted a case."
[Submit a URL →]
```

13. Responsive Strategy

Breakpoints

```
Mobile: < 640px
Tablet: 640px – 1024px
Desktop: > 1024px
```

Mobile-First Rules

- All layouts designed for mobile first; desktop is an enhancement
- Minimum tap target: 48px × 48px (WCAG 2.2 AA)
- Font size on inputs: 16px minimum (prevents iOS auto-zoom)
- Horizontal scrolling: never permitted
- Tables on landing page: scroll horizontally if needed (wrapped in scroll container)
- Dashboard sidebar: hidden on mobile; accessed via bottom bar
- Progress indicator on mobile: circles only (no text labels)

Desktop Enhancements

- Landing page sections: two-column layouts where specified (§7)
- Dashboard: sidebar visible
- Step screen container: wider breathing room (80px vertical padding vs 32px mobile)

Font Scaling

No viewport-based (vw) font sizes. All sizes are fixed `px` or `rem`. This ensures legibility is predictable and respects user browser font settings.

14. Accessibility

Standard: WCAG 2.2 Level AA

Colour contrast:

- Body text `#111111` on `#F8F7F5` : ratio 16.8:1 ✓
- White on `#0A5E5A` : ratio 5.3:1 ✓
- Teal `#0A5E5A` on white: ratio 5.3:1 ✓
- Muted text `#6B7280` on white: ratio 4.6:1 ✓ (AA for large text; borderline for small — use sparingly)

Focus management:

- All interactive elements have visible focus rings: `2px solid #0A5E5A, offset 2px`
- Modal dialogs (none used in victim flow by design — inline patterns only)
- On step change: focus moves to the heading of the new screen

Screen reader:

- Progress indicator: `aria-label="Step 2 of 4: Confirm your declaration"`
- Status badges: `role="status"`, `aria-label="Notice sent on 12 May at 10:34 IST"`
- URL truncation: full URL in `title` attribute and `aria-label`
- Form errors: `aria-describedby` linking input to error message; `aria-invalid="true"` on errored input

No-autoplay: No video, no animation that plays without user action.

No flashing: No content flashes more than 3 times per second.

Reduced motion: All transitions respect `prefers-reduced-motion: reduce`. The only animation in the design is a 150ms opacity fade on screen transitions in the victim flow — this is suppressed under reduced motion.

Keyboard navigation: Complete — every action reachable by Tab, Enter, Space, and arrow keys. No mouse-only interactions.

15. Copy & Tone Guidelines

Voice

Warm. Direct. Calm. Never bureaucratic. Never clinical. Never soft to the point of vagueness.

The platform speaks like a knowledgeable friend who happens to understand Indian cyber law — not like a legal notice, and not like a therapist.

Rules

Do	Don't
"We'll send the notice for you."	"Notice submission has been initiated."
"We never see your content."	"Content is not accessed by Asmita systems."
"The platform must respond in 24 hours — by law."	"Per IT Rules 2021 Rule 3(2)(b), intermediaries are obligated to..."
"Something went wrong. Try again."	"Error 500: Internal server error."
"Your case reference: ASMITA-202605-00042"	"Case ID successfully generated."
"You don't have to face this alone."	"Our platform provides comprehensive support services."

Hindi Copy

Every piece of UI copy — labels, headings, body, error messages, status labels — must exist in Hindi. Translation must be done by a qualified human translator, not machine-translated. Legal text (declaration, notice citations) must be reviewed by the legal advisor in both languages. See TRD I18N-02.

Length

- Headings: 6 words maximum where possible
- Body text on forms: 2 sentences maximum per screen
- Landing page sections: 3–4 short paragraphs total per section
- Status messages: one line

What Not to Say

- Do not use: "revenge porn," "leaked MMS," "explicit content," "victim" (use "you" where possible in direct UI copy)
- Do not use urgency language: "Act now," "Don't wait," countdowns
- Do not minimise: "Don't worry," "It'll be fine" — make no promises about outcomes the platform cannot guarantee

16. Developer Handoff Notes

Component Framework

Recommend: **Next.js** (App Router) with **Tailwind CSS** configured with the custom design tokens in §2. Tailwind's configuration file should encode every token as a named value — no arbitrary colour values in component code.

Font Loading

Both Inter and Noto Sans Devanagari must be self-hosted (see TRD I18N-03). Use `next/font` with local font files. Do not use the Google Fonts CDN in production.

Icon Library

Use **Lucide Icons** (MIT licence, tree-shakeable, consistent line weight). Do not mix icon libraries. All icons: 20px or 24px, stroke-width 1.5, teal where coloured.

Animation

Single transition used throughout:

```
transition: opacity 150ms ease, transform 150ms ease;
```

Wrap in `@media (prefers-reduced-motion: no-preference)` — default is no animation.

Language Toggle

Store language preference in `localStorage`. Apply to `<html lang="">` attribute. All i18n strings in a flat JSON file per language (`/locales/en.json` , `/locales/hi.json`). No server-side language detection — victim decides.

Form State

Victim flow state persists in `sessionStorage` between steps (not `localStorage` — session-scoped for privacy). On browser close, state is cleared. If victim returns via direct URL to a step they haven't reached, redirect to `/start`.

No Inline Styles

All styling via Tailwind utility classes or CSS custom properties. No `style=""` attributes on elements. This makes the design auditable and consistent.

Linting

Enforce `eslint-plugin-jsx-a11y` in CI. Accessibility violations block deployment.
